### Abstract

© Medwell Journals, 2017. The development of economic processes in the contemporary peace requires symmetrical efforts for guaranteeing the stability of markets as a whole and financial markets in particular. The development of financial markets is located under the effect of the development of economic systems and vice versa. In this connection questions of the adequate evolution of financial supervision become very urgent. In the study, problems and questions of the activity of mega-regulator in Russia in the context of the world experience of active financial policy and regulation of financial markets are illuminated. Are examined prospects, problems and marks of possible versions. The conceptual vision of nature of the development of the mega-regulation of financial markets as immanent institute in the social-economic system is stated.
