

Chapter 150

MAGNETIC PROPERTIES OF NONMETALLIC LANTHANIDE COMPOUNDS

L.K. AMINOV, B.Z. MALKIN and M.A. TEPLOV

Kazan State University, 420008 Kazan, Tatarstan, Russian Federation

Contents

List of symbols	296	3.5.2. Spin-lattice relaxation of impurity lanthanide ions	392
1. Introduction	297	3.5.3. Local distortions of a crystal lattice due to impurity ions	396
1.1. Spatial structure of some dielectric rare-earth crystal systems	301	3.6. Nuclear magnetic cooling	399
2. Internal electric and magnetic fields	306	3.7. Nuclear magnetic ordering	401
2.1. Hamiltonians of the magnetic subsystem in a crystal	306	4. Ferro- and antiferromagnets	402
2.2. Crystal field parameters	312	4.1. Paramagnetic susceptibility	402
2.3. Stark spectrum of a lanthanide ion in a static lattice	317	4.2. Magnetic ordering and critical phenomena	407
2.4. Electron-phonon interaction	326	4.3. Electric field effects	425
2.5. Free energy of a crystal and magnetoelastic interactions	329	4.4. Magnetoelastic phenomena	428
2.6. Effective spin Hamiltonians	340	4.5. Magnetic resonance	439
3. Van Vleck paramagnets	346	4.5.1. Magnetic resonance spectra	439
3.1. Magnetic susceptibility	346	4.5.2. Transient processes in internal magnetic fields	445
3.2. Magnetoelastic properties and nonlinear magnetic susceptibility	350	4.5.3. Magnetic resonance line shape	448
3.3. NMR and local magnetic fields in crystals	362	4.6. Magnetic relaxation in ordered and non-ordered phases	452
3.3.1. Distinctive features of NMR of the host lanthanide ions	362	5. Mixed crystals	457
3.3.2. NMR of diamagnetic ligands	369	6. Rare earths in $\text{RBa}_2\text{Cu}_3\text{O}_{6+x}$ compounds	471
3.3.3. Magnetic resonance line shape for nuclei of Van Vleck ions	373	6.1. Crystal structure and mesoscopic phase separation	471
3.4. Nuclear magnetic relaxation and nuclear acoustic resonance	377	6.2. Inhomogeneous and homogeneous broadening of the energy levels	483
3.4.1. Effects of thermally excited 4f-states on NMR spectra	377	6.3. Effect of copper-oxygen paramagnetic complexes on nuclear magnetic relaxation	485
3.4.2. Nuclear relaxation mechanisms	379	7. Conclusion	491
3.5. Influence of point defects on local magnetic properties	387	Acknowledgements	492
3.5.1. EPR of impurity paramagnetic ions	387	References	492
