### **Abstract**

The paramagnetic birefringence constant is modeled for the octanuclear  $\text{Fe}_4\text{Dy}_4(\text{d-L})_4(\text{l-L})_4(\text{OH})_2$  10- dl-tartrate; the cause for the stereospecific formation of the compound is revealed. © 1999 MAEe cyrillic signK "Hayka/Interperiodica".
