### Abstract

© MCSER-Mediterranean Center of Social and Educational Research. The article emphasizes the need to develop the methods to analyze and forecast economic performance based on indicators of regional accounts. It reflects the main problems of introducing the system of National Accounts of 2008 into practice of the Russian statistics: improving the methodology of calculating the System of National Accounts; adaptation of analytical approaches and theoretical models to the knowledge base and practical analysis of the socio-economic development of the region. The attention is focused on the complexities of applied analysis of regional accounts indicators. Directions for growth modeling of the regional economy are systematized. Based on the theoretical and practical criteria, the system of statistical indicators of the region's economic development is adapted.
