Abstract

© 2015, Mediterranean Center of Social and Educational Research. All rights reserved. This article analyzes the current demographic characteristics of the Republic of Tatarstan. The key indicators of the demographic situation, such as the indicators of natural (birth and death rate) and migration of population have an uncertain future. Demographic indicators are influenced by a number of different factors which can be hard to predict. At the same time the demographic characteristics of the population have highly significant implications for economic and social development of any area in a long term perspective. Demographic characteristics and trends analysis is one of the most important points in understanding the demographic future of certain region and the country as a whole. Tatarstan is one of the most socioeconomically developed regions in Russia. In recent years birth rate exceeds its deaths rate in the republic and the urban population increases annually.
