Abstract

© 2015, Mediterranean Center of Social and Educational Research. All rights reserved. At present population migration is a global problem that requires a serious and deep analysis of both how to address underlying causes of migration and its socio-economic consequences. Analyzing migration flows is necessary for both the source country and the recipient one. Migration issues in contemporary society are interrelated with the problems of economic development, with the problems of human rights and determine the features of the society development.
