In modern conditions reforming of the economy is most actively manifested in its balanced state, providing vital interests of society and dynamic socio-economic development. An important prerequisite for ensuring economic security of the state is the stability and sustainability of the national economy which presupposes property protection in all its forms, creation of reliable conditions and guarantees for business activities deterring the factors that destabilize economic development. Economic security of the state is determined by the level of productive forces development and socio-economic relations, the extent of the use of scientific and technological progress in the economy, as well as by the structure of foreign economic relations. The relevance of the study of economic security is due to the emergence of new threats that destabilize the sustainable economic development of the country. The purpose of the research is to identify the features of institutional economic security of the state, institutional contradictions of its economic security, to consider different methodological approaches to the assessment of the overall security of an economic entity, to conduct a comparative analysis of the economic security of Russia in the international scale.
