Abstract

© Serials Publications. The article discusses the causes and conditions of juvenile crime in Russia on the basis of analysis of scientific and creative approaches to highlight social and personal microcredit determinants. In the process of writing were used research methods: analysis, synthesis, statistics, comparison and others. The author notes a direct relationship between the causes and conditions conducive to the Commission of crimes minors and insufficient efficiency of measures aimed at neutralization and subsequent elimination. Attention is drawn that the problem of the causes and conditions conducive to the Commission of juvenile crime in Russia involves a comprehensive and systematic scientific approach in their research, which indicates that they are not only criminological and criminal law, and more socio-economic and cultural-educational aspects. Therefore, in order to prevent juvenile crime the necessary socio-economic and cultural-educational factors on the neutralization and elimination of causes and conditions conducive to the Commission of crimes of minors, consistent and efficient operation of all government and law enforcement agencies to prevent, identify and prosecute perpetrators, as well as the constructive activities of the state bodies, public organizations and other institutions of civil society in shaping the law-abiding younger generation of Russian citizens.
